

Custom-fit OPRO Mouthguards

Custom-fit-by-dentist D30 Antimicrobial personalised OPRO mouthguards

Custom fit

Custom-fit mouthguards fit perfectly, are comfortable and remain in place during sports activity.

One of our experienced dentists will take an accurate impression of your teeth and gums as well as make any minor adjustments before sending it off to OPRO to be manufactured by their experienced technicians.

Colours and designs

When it comes to colours and designs, OPRO has something for everyone. From single colours up to five stripes in any combination you like. There is also a fantastic range of special designs from national flags to your favourite team (if available)

Using the on-line OPRO mouthguard designer you can see instantly how your chosen colours will appear on your mouthguard and by using your mouse move it around your screen to view it from a variety of angles (see over).

Protection levels

The aim of a mouthguard is to protect your teeth and soft tissue from injury when taking part in contact sports. OPRO offer 3 protection levels in the standard and D30 range, so you can choose the protection level that suits you.

Mid level of protection. Suitable for athletes participating in contact sports involving a ball such as rugby, handball and basketball.

High level of protection. Ideal for athletes participating in stick and combat sports such as hockey, lacrosse, boxing, taekwondo, MMA or for any contact sport athletes seeking a highly protective mouthguard.

The ultimate protection. This uniquely designed mouthguard consists of three layers and offers top of the range protection. Suitable for all athletes seeking the most protective mouthguard for their sport.

D3O - The thinnest custom-fit mouthguard

D3O is a patented protective material, which absorbs more energy at the point of impact than the material typically used in OPRO's original custom-fit mouthguards.

D3O physically changes on impact from a soft and flexible material to one that is tough, rigid and consequently, highly protective.

The use of D3O in OPRO mouthguards allows OPRO to offer you a revolutionary mouthguard which is around 50% thinner than the equivalent original OPRO custom-fit without compromising on the most important factors to you, protection and comfort.

Antimicrobial

Based on silver ion technology and completely safe for use in the mouth, Biomaster's antimicrobial additive is proven to inhibit the growth of bacteria by up to 99.99% and to be effective against antibiotic-resistant bacteria such as MRSA giving you peace of mind that your mouthguard will stay germ free wear after wear.

Odour and taste free, the additive lasts for the lifetime of the product and is tested to ISO standards so you can be assured it has been tested to the highest possible levels.

The science behind the protection

Mouthguards act like a shock absorber, both spreading the force over a larger area and increasing the time for the peak force to occur. Dissipating the energy of the blow over a larger area and longer time reduces its effect preventing or vastly reducing any injury.

Mouthguards are made from a flexible and compressive material which allows the impacting object to slow down and reach a halt over a longer period of time and hence the resulting transmitted force is reduced.

Special Offer

The RRP of a custom-fit-by-dentist D3O antimicrobial mouthguard starts at £120. Arnica is offering this mouthguard to existing patients, members of local sports clubs and students of local schools and colleges for only £60

How to order

Go to www.opro.com/Catalogue/Build-Your-OPRO/Mouthguard-Builder

Choose how you want your mouthguard to look by selecting one of the following designs:

>> School/Club

Check if your School or Club design is listed. If it is note the name of the mouthguard on the form provided.

If your school and club is not listed then choose one of the following options.

>> Special design

Choose one of OPRO's special designs and note the name of the design on the form provided.

>> Stripes

If you prefer stripes then select the number of stripes (from single colour to 5 stripes) then select the first stripe (S1) on the mouthguard visual and using the colour chooser select the colour for that stripe. Repeat for each stripe writing down the corresponding colour for each stripe.

Number the stripes from left as per the following 5 stripe example:

(from left to right)

S1 = Aqua Marine S2 = Dark Blue S3 = FL-Pink S4 = Red S5 = FL Green

>> Single Colour

As above but select one colour only

Next steps

Using OPRO's online mouthguard builder, as instructed above, please complete the form on the reverse of this page then contact Arnica to book your custom-fit appointment.

Please bring the completed form with you to your appointment.
